THE PHANTOM PDC REAMER

DESIGNED FOR HORIZONTAL, SHALE WELL DRILLING

**STABIL
DRILL**

A SUPERIOR ENERGY SERVICES COMPANY

THE
**PHANTOM PDC
 REAMER**

For Horizontal, Shale Well Drilling

When drilling with a motor in horizontal shale wells it is common to have issues with getting out of the hole due to ledges and cutting beds that form in the wellbore... until the development of the Phantom PDC Reamer.

The Stabil Drill Phantom PDC Reamer is an eight-foot, eight-bladed PDC reamer that is positioned approximately 60' above the BHA. The Phantom PDC Reamer allows the wellbore to be cleaned and cleared either by back reaming on rigs that have top-drive, or for rigs without top-drive, by pulling out to the top of the curve and then rotating forward until reaching total depth. This flexible solution eliminates wiper trips saving time and money.

If a designated reaming trip is preferred, we recommend the PDC Devil Drill be positioned approximately 60' below the Phantom PDC Reamer. This allows for higher RPMs and greater GPM for enhanced wellbore cleaning.

The Phantom PDC Reamer is available to accommodate your specific drill string specifications and casing programs.

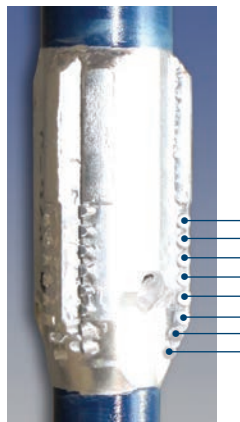

The Phantom PDC Reamer has documented successful runs in the Bakken, Barnett, Haynesville and Eagle Ford shale regions.
